

Finished envelope size: 2 ¾" x 3 ¾" Fits a regular sized gift card.

Two ways to use this template:

- To make a **reusable template**, print on cardstock paper and cut out the heart. Lay the template on any paper of your choice; trace the heart and cut. The dotted lines help you see how to fold the heart into an envelope.
- To make an **easy-to-fold pattern**, print directly on the paper you are using for your heart envelope. Cut and fold along the dotted lines. If your paper is patterned on one side, be sure to put it in your printer PATTERN SIDE UP so the fold lines will not show.
